

National Center for the Review and Prevention of Child Deaths - Case Reporting System Wisconsin Data Analysis Request

The Child Death Review Case Reporting System is a valuable tool. Each team that contributes data to the CDR-CRS has the ability to look at standardized reports of their team's data, download a file of the 250 most-accessed variables within the CDR-CRS, and download all of the raw data tables containing their team's data. Nevertheless, assistance is often needed in working with this data and analyzing it to answer important questions about the cases that have been reviewed. Please complete this form to obtain assistance and submit it to your Children's Health Alliance of Wisconsin KKA staff person. Data analysis requests will be processed in the order in which they are received, and require 4 weeks from the date of submission to be completed. Please keep this in mind when submitting requests.

Information about your data analysis request

What big-picture question are you hoping the data can answer or what are you hoping to be able to say as a result of the data analysis (e.g., the top causes of death in the county, whether SUID deaths are a problem in the county)?

What smaller question(s) are you hoping the data can answer (e.g., risk factors for a particular cause of death, characteristics of decedents for a certain type of death)?

What sections of the Case Reporting form do you believe will help answer your question(s) (e.g., Section H, Section K)?

What age-group(s) are included in your big-picture question and/or in your smaller question(s)?

What age range of deaths does your team review?

What years of data are you interested in (please use numbers)?

Additional information about your data analysis request

When do you need the results of the analysis by (please use dates)?

Have you investigated the use of any of the following data sources with regard to this request?

- CDR-CRS standardized reports
- CDR-CRS flat file and/or raw data
- Wisconsin Interactive Statistics on Health (WISH online query)
- County Health Rankings
- KidsCount
- None of the above
- Other

Please specify what you would like to appear in the completed data analysis report:

- A table of the results of the analysis
- A list of variables and their respective sections of the Case Reporting form used in the analysis
- An interpretation of the results (i.e., a written summary of the results with an explanation of what the results mean)
- Other
