

# FOOD INSECURITY AND HEALTH PILOT

## PURPOSE

To enhance families' experiences through a successful referral process for all children by connecting food pantries and primary care clinics to improve food security and health.

## HEALTH CARE SYSTEMS AND FOOD SYSTEMS WORKING TOGETHER

### Regional Centers

Wisconsin has five Regional Centers dedicated to supporting families with children and youth with special health care needs and the providers who serve them.

Services are private and free.

The medical home initiative works as a bridge across health care and food systems bringing partners together to facilitate ongoing communication, coordination and information sharing.

### Data sharing

It is important to determine if our efforts are working or need improvement.

### Inter-professional development

Food and health systems share similar goals. Learning about each other and the opportunities to work together are essential.

### Shared advocacy

It is important to leverage each other's expertise and resources to make an impact at a higher level.

### Sustainability

A champion within each system is key to keeping this work moving forward.
