

Asthma

Asthma control

=

Healthy outcomes

While the number of people with asthma has increased, asthma hospitalizations and ED rates have decreased.

Early literacy

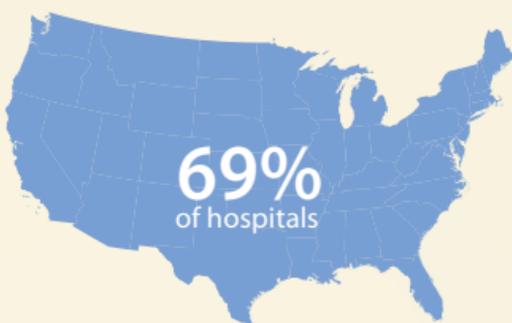

3 out of 10 children enter school unprepared to learn.

88% never catch-up.

Children who read early do better in school.

Emergency care

Wisconsin is below the national average for pediatric readiness.

Grief and bereavement

More than 400 Wisconsin infants die each year.

Injury prevention and death review

Preventing injury-related deaths in a community also prevents future injuries.

Lead poisoning

More than 450,000 Wisconsin children under the age of 6 were reported lead poisoned since 1996.

Oral health

27,867

visits to Wisconsin emergency departments in 2010 for preventable dental problems.

Our mission is to ensure Wisconsin children are healthy, safe and able to thrive.

Collaboration

We build and lead coalitions. We bring together diverse groups of people and organizations to make a difference.

Advocacy

We advocate for quality services and access for all children. Along with our partners, we work to reduce health disparities, raise awareness, influence policy and promote action on important issues.

Mobilization

We mobilize leaders and people around our key initiatives. We implement effective programs and policies and build capacity with our partners to drive change.

Support

We provide education, training and support for health professionals and families in our community. We ensure anyone working with families is equipped to help Wisconsin children.
