

2023 - Recap

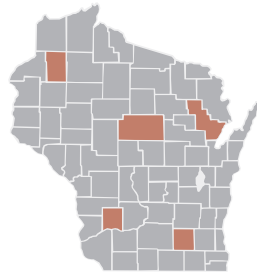

WISCONSIN CHILD DEATH SCENE INVESTIGATION TRAININGS

365
Attendees

From across Wisconsin representing 176 agencies: medical examiners, coroners, law enforcement, child protective services, emergency medical services, and physicians

5
Counties

Jefferson, Marathon, Oconto, Richland and Washburn counties

160
Kits

Doll reenactment kit contents provided to local agencies: duffel bag, doll, flash drive, placed/found cards

Post-survey results

Attendees' percentage of correct responses increased between the pre and post-test for 80% of questions.

Additional results

99%

Would recommend the training to a colleague

90%

Felt the information was clearly articulated and presented

90%

Felt the instructors were engaging and knowledgeable

83%

Felt the material was relevant to their work

Sample comments

WHAT ATTENDEES ENJOYED MOST

"The training was very informative and upbeat, despite the nature of the training. They brought several real and personal stories into the training."

"This training was straight to the point and on task. I have been to trainings where instructors stray from the topic or a topic is scheduled for too long and is a waste of time. This training was straight forward, taught in an easily understood manner, and was time appropriate for an intro class."

"Instructors come from a variety of disciplines that all play a role in the investigation and were knowledgeable on the material."

ATTENDEE IDEAS FOR IMPROVEMENT

"Even though I appreciate the information was presented in a timely manner, it could be a 6-8 hour course. Possibly a more in-depth case study."

"Maybe setting up a mock scene? To see what we pick up on."

"Talking about the investigation from each agency perspective. What is their role and how do they appropriately conduct their portion for everyone else? It would be nice to see this from a 360-degree approach - first responders, law enforcement, CPS, and forensic pathology. The better we understand what our partners are doing, the better we can all work together towards the common goal. This would also feed directly into Child Death Review Teams."
