

INJURY PREVENTION AND DEATH REVIEW

DISCUSS - PREVENT - SAVE LIVES

**70
EACH DAY**

EMERGENCY ROOM VISITS
BY KIDS YOUNGER THAN
AGE 18 DUE TO INJURIES

**1
EACH WEEK**

INFANT DEATH
AS A RESULT OF SUID
(ON AVERAGE)

**170
EACH YEAR**

PREVENTABLE DEATHS OF
KIDS YOUNGER THAN AGE 18
FROM UNEXPECTED INJURIES

**WE PROVIDE
TECHNICAL SUPPORT
AND TRAINING**

Child Death Review (CDR)

Local teams review unexpected child deaths to identify risk factors that inform actionable prevention recommendations.

Fetal Infant Mortality Review (FIMR)

Local teams review infant deaths to improve birth outcomes and recommend systems change from causes of prematurity, still-birth, sleep-related and more.

**WE IMPLEMENT
PREVENTION
PROGRAMS**

Sleep Baby Safe (SBS)

A collection of trainings and resources for professionals to use for infant safe sleep outreach and education efforts when working with families and caregivers.

Sudden Unexpected Infant Death (SUID) Case Registry

As the Wisconsin grantee for the Registry, we are able to perform expanded SUID surveillance to monitor trends, enhance community-based prevention and improve data quality and consistency.

**WE MANAGE DATA
COLLECTION
AND ANALYSIS**

Data

Helps local CDR and FIMR teams use a standardized data system to improve data quality. Supports program evaluation and identifies trends through data analysis.

Injury prevention

Offer recommendations and actionable prevention strategies that raise awareness about injury and fatality trends to improve programs, policies and behaviors that keep kids alive.

Take action

Advocate for policy changes with legislators.
