

Wisconsin's voice for children's health

We raise awareness, mobilize leaders, impact public health and implement programs proven to work.

6 key initiatives - 1 united voice - taking action for kids' health

Mission: We work to ensure children are healthy, safe and able to thrive.

Advancing pediatric emergency care

Kids are not little adults. We help train emergency providers through hands-on workshops focused on managing pediatric respiratory distress, trauma and pain control. We distribute resources to emergency departments and EMS agencies to ensure children get proper care.

Key programs:

- Emergency Medical Services for Children (EMSC)
- Pediatric Emergency Care Coordinator (PECC)
- Pre-hospital and emergency department readiness
- Special needs readiness

Healthy spaces for kids to live, learn and play

We provide education, resources and tools to support asthma awareness, prevent lead poisoning and eliminate disparities. In Wisconsin, asthma and lead poisoning have significant impacts on a child's quality of life, which in turn affects both families and communities. We are dedicated to reducing those impacts and creating healthy environments for all children.

Key programs:

- Wisconsin Asthma Coalition (WAC)
- School and child care walkthrough program
- Medication assistance program
- SAMPRO
- Lead poisoning prevention

Hope for the grief journey

We reach out to families who experience a sudden and unexpected infant loss to offer services and resources throughout their grief journey. We also offer self-care resources and support for professionals.

Key programs:

- Grief resources
- Infant Death Center (IDC)
- Self-care

Discuss – Prevent – Save lives

We provide support to local county teams who review child deaths to identify risk factors and circumstances surrounding each death. These reviews offer valuable data for us to analyze trends, and help drive the prevention of future deaths.

Key programs:

- Child Death Review (CDR)
- Fetal Infant Mortality Review (FIMR)
- Keeping Kids Alive in Wisconsin (KKA)
- Sleep Baby Safe (SBS)

Early screening and coordinated care

We work with health professionals as well as community-based organizations to provide training and tools to improve screening and care coordination practices.

Key programs:

- Developmental screening
- Mental health screening
- Food Insecurity and Health Pilot (FIHP)
- Mental health screening
- Care coordination for children and youth with special health care needs

Improving dental access for kids

We work to improve access to dental care for kids. We make it possible for kids to receive quality dental care at school and we are working toward incorporating dental care into routine medical checkups. We partner with oral health advocates statewide to move toward improved oral health and therefore overall health for Wisconsin children and families.

Key programs:

- Wisconsin Medical Dental Integration (MDI)
- Wisconsin Oral Health Coalition (WOHC)
- Wisconsin Seal-A-Smile (SAS)

The why and who that drives our work

Why is Children's Health Alliance of Wisconsin important?

Kids need a voice at the table in regard to their health and safety.

Why does the Alliance work on these six initiatives?
