

Injury Prevention and Death Review

Discuss | Prevent | Save Lives

Injury prevention and death review is one of the six health initiatives at Children's Health Alliance of Wisconsin. Each year more than 350 Wisconsin children, ages 1 month to 17 years, die from reasons other than terminal illness. Approximately 50 percent of these deaths are preventable.

Our programs and resources

- **Keeping Kids Alive** is a program comprised of 43 local child death review teams and five fetal infant mortality review teams. These teams are multidisciplinary and prevention focused, working to improve the health and safety in their communities.
 - **Child Death Review** teams review child deaths in their county utilizing a prevention framework. These multi-disciplinary teams identify risk factors and trends that lead to prevention recommendations for community partners to implement.
 - **Fetal Infant Mortality Review** teams review stillbirth and infant deaths to gain a greater understanding of the risk factors surrounding each death. These teams seek to improve birth outcomes and reduce disparities related to prematurity and stillbirth.
- **Sleep Baby Safe** consists of evidence-based safe sleep trainings and resources for professionals working with families. We support tribal and local health departments and other community-based organizations in addressing infant safe sleep. Sleep Baby Safe resources are intended to enhance local efforts to promote a consistent, clear and concise message on infant safe sleep.

Our role

- **Provide** technical support to child death review and fetal infant mortality review teams.
- **Support** communities' injury prevention efforts.
- **Advocate** for policy changes that provoke legislative action on the state and local levels.

Take action

- **Collaborate** with your community partners to prevent future child deaths.
- **Advocate** for policy changes with your district legislators on important child health issues.
- **Subscribe** to our electronic newsletter, *Safety Net*, to learn more about our efforts and other injury prevention information.
