

2021 Developmental Screening Quality Improvement Project

AIM	Drivers	Tests of Change
<p>By December 31, 2021, 25% of LPHD teams will have the capacity to outreach to new partners to promote developmental screening and surveillance.</p>	<p>Community partners are informed and activated</p>	<ul style="list-style-type: none"> • Conduct a community needs assessment • Increased information sharing about developmental screening and surveillance with new parents • Participate in learning community opportunities on developmental screening • Local public health department provides education and promotion of developmental screening and follow up in their community
	<p>Strong relationships with relevant partners</p>	<ul style="list-style-type: none"> • Develop relationships with a clinical partner who is conducting developmental screening to learn about processes, barriers and ways to collaborate • Outreach to clinical partners to influence developmental screening in practice • Intentional collaboration with other statewide partners who connect with children at most risk • Enhance partnerships through learning community calls
	<p>Systems exist that identify children in need of screening and appropriate follow-up</p>	<ul style="list-style-type: none"> • Identify, promote and encourage referrals for early intervention to established referral networks • Promote partners (Regional Center for CYSHCN & Well Badger Resource Center) who can support follow up for early intervention • Intentional collaboration with community coalitions to support advocacy efforts that promote community wide awareness of screening and referral to early intervention • Intentional collaboration with medical providers and medical systems to promote system wide screening and referral to early intervention • Intentional collaboration with child care providers to support advocacy efforts that promote community wide awareness of screening • Partner with statewide organizations to discuss advocacy efforts around data collection and sharing

Measures

1. Percent of LPHD teams outreaching to new partners to promote developmental screening and surveillance (Outcome) (goal = 25%)
2. Percent of LPHD teams who indicate their confidence around developmental screening has increased by end of year (Process) (goal = 50%)
3. Percent of LPHD professionals who disagree/strongly disagree that developmental screening work competes with COVID responsibilities (Balancing) (goal = 50 %)
